

# WHY BUY A CIRCLE E SERVICE DOG HARNESS ?

Attention to detail, common sense ergonomic design, years of experience, and listening to my customer, is why the Circle E Service Dog harness is the best quality, best fitting, most comfortable, and easiest to use for the end user, on the market today.

The Circle E Service Dog harness is designed to last a life time. I use only the very best quality leather and hardware. The M2 buckles are the easiest to use and are guaranteed for life. The D rings and side buckles are stainless steel and will not ever rust. The under liners are made with high quality 3/4" Saddle shearing, the best money can buy. The metal is light weight aircraft Aluminum; very strong, but very light weight.

Please look at the pictures below and you will see the quality in the Circle E Harnesses. Note: All harnesses are custom made to your specifications. If you ever want to deviate from my design, that's no problem, I do not have harnesses in inventory, so I do not have to worry about selling my inventory before I can make a design change. My turn around time is usually right around one week. Service Dog Harnesses take priority in my shop. AND, I'm always happy to talk with customers and answer any questions you may have ( *Note: see sizing & pricing sheet inside catalog cover pocket.*).

HARNESS WEIGHTS AVERAGE BETWEEN 2 POUNDS FOR THE STANDARD HARNESS AND 3 POUNDS FOR THE SUPPORT X HARNESS. ( NOTE; DEPENDING ON LENGTH OF HANDLE )

UNDER SIDE OF SADDLE-NOTE THE BACK BONE PRESSURE RELIEF AREA. THERE IS 3/8" NEOPRENE PADDING ON EITHER SIDE OF THE DOG'S BACK BONE.

NOTE THE ATTENTION TO DETAIL, ROLLED LEATHER EDGES. LEATHER COVERED HANDLE SUPPORTS, HEAVY DUTY MATCHING STITCHING, QUALITY LEATHER, AND DOUBLE LEATHER IN THE HANDLE SUPPORT AREA.
